

Environmental Policy

Polymer Systems Technology Limited is predominantly a supplier of Nusil silicones with a marginal cyanoacrylate business manufactured by Chemence Limited and purchased through their authorised representative.

In 2008, PST purchased the assets of Amisil Ltd and this enabled the addition of the silicone tubing range.

The company was started in 1994 at Victoria House in High Wycombe and has grown progressively resulting in a move to the current offices in 2005.

We recognise that protection of the environment requires commercial activity to be conducted in a sustainable manner.

We have developed a comprehensive Environmental Management System, which ensures compliance with all applicable environmental legislation, regulations, codes of practice and any other standard to which the Company subscribes.

We will strive to adopt the highest environmental standards in all areas of operation, meeting all relevant legislative requirements, through:

- The consideration of environmental issues in all business strategies and initiatives.
- Prevention of pollution, reduction of waste and minimisation of resource consumption.
- Education of employees in how to carry out tasks in an environmentally responsible manner.
- The setting and monitoring of objectives and performance indicators to ensure continual improvement of our environmental management system and to enhance environmental performance.
- The purchase of sustainable products wherever feasible.
- The reduction in risks from environmental hazards for employees and others near our operations.

The Company is committed to continual improvement of its environmental performance. This Policy will be communicated to all employees and contractors and be available to the public through selected media.
