

Silicone Materials for Food Contact

A Food Contact Substance (FCN) is defined as “any substance intended for use as a component of materials used in manufacturing, packing, packaging, transporting, or holding food if such use is not intended to have a technical effect in such food” (21 U.S.C. 348 (h) (6)).

Below you will find NuSil’s product listing of cured (as prescribed on the product certification) and washed elastomers that meet the extraction requirements of 21 CFR 177.2600 for Rubber Articles Intended for Repeated Use. Most of NuSil’s (material) elastomers can be tested per this requirement. Please contact NuSil Technology to make testing arrangements for any product not listed in the table below.

High Consistency Elastomers	Adhesives
MED-4020 MED-4035 MED-4065 MED-4032 MED-4042 MED-4052 MED-4072 MED-4082	MED-1011 MED-1037 MED1-4013
	Low Consistency Elastomers
	MED-4011 MED-4044 MED5-6382 MED-6010 MED-6015
Liquid Silicone Rubbers	Dispersions
MED-4920 MED-4930 MED-4940 MED-4950 MED-4960 MED-4970	MED10-6605 MED10-6607 MED10-6670
